

Vortical Enclosure Dynamics — Generative Chain

axiom: 差がある (there is difference)

$$C = 1 - \exp(-\lambda \rho H), \rho = \Sigma C, d\tau/dt = \rho$$

PARTICLES
triangular closure attractors

$m \propto 1/\Delta^2$

SU(3) SU(2) U(1)

GRAVITY
vorticity-driven geometry

$\nabla^2 \Psi' \propto L_\alpha, G = f(\kappa_B, e, \lambda)$

BLACK HOLE
fixed-point breakdown
 $\sigma > 0$ reignites
 $L \rightarrow L_{\text{max}}$ (forbidden)

COSMOLOGY
sustained log-generation $\sigma > 0$

$dp/d\tau + 3\gamma p^2 = \sigma(\rho) \cdot BH \text{ interior} \leftrightarrow \text{early universe}$

closure $\rightarrow$ particle

fixed-point eq.

breakdown
